

Are you done tackling grease problems like it's 1980?

We improve your operations and save you money, time and CO_2

"With H2O Shift, we can save money without compromising on anything."
JENS RIIS, OPERATIONS MANAGER, STICKS'N'SUSHI DENMARK

Can you recognise this?

01 **Frequent pump-outs and cleaning**
Routines recur more often than operations should require.

02 **Grease, odours and deposits**
Problems return in ventilation, drains and equipment.

03 **Rising resource use**
Oil, chemicals and electricity take up more of the operating budget.

04 **Filters changed too soon**
Consumption rises without addressing the underlying cause.

05 **Downtime and maintenance**
Unplanned interventions disrupt the kitchen's daily rhythm.

06 **Slow cooling, frequent defrosts**
Cooling works harder and uses more electricity than necessary.

THE USUAL APPROACH

TREATING SYMPTOMS

- × Chemical cleaning and extensive maintenance
- × Frequent emptying
- × Filter changes as an ongoing operating cost
- × Grease build-up in hoods, ducts and drains
- × Risk of grease-related operational and fire problems

WITH H2O SHIFT

SOLVING THE PROBLEM

- ✓ No chemicals or electricity in the solution
- ✓ Less grease build-up and less downtime
- ✓ Fewer emptyings, cleanings and filter changes
- ✓ Lower oil use and longer oil life
- ✓ Reduced fire risk and more efficient cooling

We raise the standard in professional kitchens

In many professional kitchens, operational problems are still dealt with as they were 50 years ago. With H2O Shift, that is over – we remove the problem, not just the symptoms.

IMPACT IN NUMBERS

REDUCED	UP TO 40%	UP TO 75%	UP TO 50%	~20%
FIRE RISK & LIMESCALE	LOWER OIL CONSUMPTION	FEWER PUMP-OUTS	FEWER FILTER CHANGES	SHORTER COOLING TIME

GREASE TREATMENT

POWER2AIR/GREASE

Reduces grease deposits around griddles, grills and ovens. Extends the lifespan of frying oil.

POWER2AIR/VENT

Keeps the ventilation duct continuously clean from extractor hood to fan. Reduces fire risk.

POWER2H2O/WASTEWATER

Reduces grease blockages and odours in drains and grease traps. Ensures better utilisation.

AIR TREATMENT

POWER2AIR/CLIMATE

Treats indoor air, balances temperature and reduces dust and moisture.

WATER TREATMENT

POWER2H2O/ANTISCALE

Prevents blockages and reduces limescale deposits in wastewater systems.

COOLING TREATMENT

POWER2AIR/COOLING

Reduces frost and ice on the evaporator. Delivers faster cooling and fewer defrosts.

We are not your supplier.
We are your partner.

OUR PARTNERSHIP PROCESS

01 · ASSESSMENT
Can we solve it?

02 · BOOKING
Planning the work

03 · INSTALLATION
Setting up the solution

04 · CHECK
Measurement and report

05 · OPERATIONS
Ongoing optimisation

WHAT WE TAKE CARE OF

01 Define the baseline and success criteria.

02 Provide an app with all relevant information; reports, documentation and support.

03 Agree a practical plan for TPM measurements.

04 Follow up and document progress.

05 Adjust the solution and routines together.

WHAT WE NEED FROM YOU

01 Nominate a responsible point of contact.

02 Share a simple baseline for consumption and costs.

03 Follow the agreed routines and settings.

04 Log selected measurements and note unusual observations.

05 Actively reduce purchases and consumption when supported by the data.

TRACK THE IMPACT

Fewer pump-outs, cleanings and filter changes

Lower oil, chemical and electricity consumption

Less grease, odour and build-up

Fewer operational stoppages and less maintenance

Faster cooling and fewer defrosts

Real results.
Real partners.

See how we help professional kitchens save money, time and CO_2 – while also improving everyday life for their employees.

5 reasons to choose H2O Shift

PROVEN RESULTS
15+ years' experience. 5000+ installations.

REMOVES THE PROBLEM
Not just the symptoms. We stay until it works.

THE ONLY ONES WORLDWIDE
We are the only ones in the world to use discharge to treat grease, air and water.

NO CHEMICALS & ELECTRICITY
Treating grease, air and water with nature's own forces.

DANISH TECHNOLOGY & PRODUCTION
Developed and produced in Denmark after high Danish quality standards.

H2OShift

What's troubling your kitchen?

We're a team of decent people who challenge what others have accepted as good enough – and you can rely on us. We don't sell products and disappear. We provide solutions, stay until they work and document it.
